

MyWebSearch Toolbar

1. General

Malware name: MyWebSearch Toolbar

Malware Type: Adware, BHO, Toolbar

Company Name/URL: <http://www.mywebsearch.com>

Company Description: IAC Search & Media.

My Web Search, is a property of IAC Search & Media. The MyWebSearch toolbar lets user search the web using either google, yahoo, Looksmart etc. The toolbar is also equipped with a popup stopper. The toolbar has links to some of the funweb products (Screensavers, cards etc) also.

The toolbar shows popup ads from its affiliates and contains links to other Adware programs also. The toolbar collects the information from the user's browser and watches his browsing activity. The toolbar changes the user's IE search settings and homepage. The toolbar is installed for other browsers also(eg If the user downloads the toolbar for Internet Explorer and he has Firefox also the toolbar installer will automatically detect it and installs the toolbar for firefox also). The toolbar installer also installs some Outlook plugins.

Characteristics/Symptoms:

- Collects information about the pages visited
- Slows the browser
- Can change the IE search settings
- Communicates with the host server
- Shows popup ads from its affiliates
- Contains link to other sites also.
- Changes the IE homepage

Security Level: High

Operating OS: WIN XP

Installation Type: Installed through ActiveX

Operation: After Installation

Time of Operation: After Browser Restart.

5. Description

The MyWebSearch toolbar lets user search the web using either google, yahoo, Looksmart etc. The toolbar is also equipped with a popup stopper. The toolbar has links to some of the funweb products (Screensavers, cards etc) also.

The toolbar shows popup ads from its affiliates and contains links to other Adware programs also. The toolbar collects the information from the user's browser and watches his browsing activity. The toolbar changes the user's IE search settings and homepage.

EULA

The purpose of this document is providing our users with a detailed and easy manual removal process or a help guide & and tools to self remove any malware users detect on their machines. Users are requested to use these guides and tools at their own risk.

These removal guides & tools would focus on applications that are considered as spyware, hijackers, rogue products, adware or other kind of malware.

These guides are developed by our technicians as logs while they personally successfully removed or disabled the malware. Please note that while using these guides users would be as successful as our technicians were while they prepared the processes. In case you feel there is something that should be added or something that we missed out please feel free to report to us at our contact page or by posting reply to the topic.

Please read site EULA here for more information
